← course home (/table-of-contents#section_dynamic-programming-recursion_question_coin)

Your quirky boss collects rare, old coins...

They found out you're a programmer and asked you to solve something they've been wondering for a long time.

Write a function that, given:

1. an `amount` of money
2. a list of coin `denominations`

computes the number of ways to make the `amount` of money with coins of the available `denominations`.

Example: for `amount=4` (4¢) and `denominations=[1, 2, 3]` (1¢, 2¢ and 3¢), your program would output 4—the number of ways to make 4¢ with those `denominations`:

1. 1¢, 1¢, 1¢, 1¢
2. 1¢, 1¢, 2¢
3. 1¢, 3¢
4. 2¢, 2¢
